

Loop Detector

Features

- High temperature stability, used in kinds of environment
- Environment drifting compensate automatically
- Multilevel lightning protection
- With function of sensing loop malfunction automatically (disconnection or cutting-out)
- Cooperate with barrier gate to realize vehicle anti-hit and automatic close function

Product Parameter :

Power Supply: 220VAC、110VAC、24V/DC、12VDC/AC(Optional and details as sticker on products)

Rated power: 4.5W

Output Mode: relay output

Operating Temperature: -30°C to 70°C

Operating Frequency: 20KHz to 170KHz

Installation: DIN lead rail

Reaction Time: 10ms (fastest)
